

**AMENDMENT TO THE SPECIFICATION:**

Please amend the paragraph beginning at page 6, lines 6-13 as follows:

The thermoplastic composition according to the invention may also comprise a blend of aromatic polycarbonate and polyester. In such blend both the polycarbonate and/or the polyester can be the major component; that is form a continuous phase or matrix. The ~~[[ration]]~~ ratio between the polycarbonate and the polyester may vary between wide limits, e.g., from 1/9 to 9/1. The advantage of these blends is that an optimum combination of properties may be obtained. Preferably, the composition comprises a blend of bisphenol-A polycarbonate and polybutylene terephthalate.
